

## Education for Daycare Providers: Asthma Management and Radon Awareness

Asthma Management and Radon Awareness is a combined 90-minute virtual training offered to childcare providers. Asthma Management provides information on how daycare providers can identify when a child is having an asthma episode, how to avoid triggers and proper medication adherence. Radon awareness provides an overview of radon and radon testing policies for day care providers.

This training is offered by webinar and is free of charge for daycare providers in Illinois. Each in-home daycare provider will receive a free radon test kit by mail following the training.

---

**Asthma Management** is a free, virtual 45-minute training available for childcare providers. Asthma educators will provide an in-depth review covering the following:

- Early warning signs of asthma
- Common asthma triggers
- Proper medication use
- Handling an asthma emergency
- CPS asthma management policies and procedures

**Radon Awareness** is a 45-minute training available to childcare providers that covers the following:

- Overview of radon and lung cancer
- How to test your facility for radon
- Radon testing policies

**Note: Daycare providers are required by law to test their facilities for radon once every three years.**
